DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 41 and 44-46 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Cooper (US 6,173,836) in view of the admitted prior art of record in the instant specification as shown in figures 1-6 embodiments. Cooper discloses a length of continuously connected fastener stock comprising: a first and second side members (107 & 109) wherein said first and second side members are generally circularly shaped with a pair of flattened surfaces in transverse cross-section (see figures 6c & 6b); and a plurality of cross-links (105) interconnecting said first and second side members; wherein said first side member is shaped to extend transversely beyond said cross-links with an actuate surface, and each of said plurality of cross-links asymmetrically bisecting said first and second side members. Cooper does not appear

to disclose the cross-links having a flat surface and an actuate surface. As admitted by applicant cross-links that have both a flat surface and an arcuate surface are well known in the art. (Figures 1-6 embodiment of the instant application). Therefore, with respect to the shape of the cross-links it would have been an obvious matter of design choice to modify the shape of the cross-links in view of the teaching of the admitted prior art of record in the instant specification and since such a modification would have involved a mere change in shape a component. A change in shape is generally recognized as being within the level of ordinary skill in the art. *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

Contrary to applicant's argument figures 6(a) thru 6(c) clearly discloses the cross-links asymmetrically bisecting the first and second side members.

Allowable Subject Matter

4. Claims 19, 21-22, 24, 32, 37 and 47 allowed.

Response to Arguments

5. Applicant's arguments filed 12/29/2006 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the ends are not arranged end-to-end or as part of a uniform structure) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
